

WELCOME TO DRONE CAREER EXPLORER

Drone Career Explorer is a career-connected learning pathway that helps students investigate how drones, artificial intelligence, data, and human decision-making connect to real industries and emerging careers. Students move beyond viewing drones as flying devices and begin examining the larger systems of people, technology, information, processes, responsibility, and purpose that make drone-enabled work possible.

MIDDLE SCHOOL

GRADES 6-8 | EXPLORE THE SYSTEM

- Discover how drone systems connect people, technology, data, safety, and purpose.
- Build responsible-use habits, systems thinking, teamwork, and career awareness.
- Culminate in the Drone Career Challenge - a responsible solution concept for a real-world need.

HIGH SCHOOL

GRADES 9-12 | APPLY THE SYSTEM

- Analyze mission planning, AI and sensors, aerial data, industry workflows, and human accountability.
- Strengthen evidence-based reasoning, workforce readiness, communication, and career portfolio development.
- Culminate in a Capstone Mission Proposal that students research, design, communicate, and defend.

ONE PATHWAY. TWO GRADE BANDS. ONE FUTURE-READY VISION.

Think critically. Design responsibly. Explore careers. Solve real problems. Lead with innovation.

WHAT MAKES THE PATHWAY DIFFERENT

CAREER-CONNECTED	NO-FLIGHT-READY	EVIDENCE-DRIVEN	HUMAN-CENTERED
Every unit links learning to industries, roles, and future pathways.	Rigorous learning can occur through cases, planning, simulation, and data analysis.	Students explain decisions using information, comparison, and reasoning.	Safety, privacy, responsibility, and human judgment remain central.

Designed for STEM/STEAM, CTE, technology electives, enrichment, after-school, summer, and workforce-readiness settings.

THE PROGRAM PROMISE

Students move beyond asking “How do drones work?” and begin asking: What problem are we solving? What evidence do we need? What safeguards are necessary? Who remains responsible? Where could I fit into this future?

HOW TO USE THIS CURRICULUM ENVIRONMENT

Begin with the START HERE materials, then move into the grade-band course that matches your implementation context. Each course follows the same resource sequence so educators can orient, plan, teach, assess, and implement with confidence.

1 INTRO VIDEO Orient	2 FACILITATOR GUIDE Plan	3 STUDENT WORKBOOK Engage	4 ASSESSMENT + CAPSTONE Assess	5 IMPLEMENTATION GUIDE Launch
-----------------------------------	---------------------------------------	--	---	--

WHAT STUDENTS EXPLORE

SYSTEMS + TECHNOLOGY How drone-enabled systems connect tools, people, data, workflows, and mission purpose.	AI, SENSORS + DATA How information is collected, interpreted, evaluated, and used to support decisions.	MISSION PLANNING How goals, constraints, stakeholders, evidence, and processes shape a responsible solution.
SAFETY + RESPONSIBILITY How privacy, ethics, safety, accountability, and human judgment guide technology use.	INDUSTRIES + CAREERS How drones support construction, infrastructure, logistics, media, real estate, mapping, and emerging fields.	PORTFOLIO + CAPSTONE How students communicate learning, reflect on growth, and connect evidence to future pathways.

FUTURE READY AI LEARNING CYCLE

LAUNCH	EXPLORE	EXPLAIN	CREATE	REFLECT	EXTEND
IMPLEMENTATION NOTE Drone Career Explorer is an educational and career-exploration program. Students do not need to physically operate a drone to complete the curriculum. Rigorous learning can occur through cases, videos, diagrams, simulation, mission planning, image/data analysis, career research, project challenges, and teacher demonstrations. The curriculum does not represent FAA certification or professional pilot authorization.				START WITH PROGRAM OVERVIEW RESOURCE MAP GRADE-BAND COURSE	

THE DRONE CAREER EXPLORER MINDSET

What problem are we trying to solve? | What information do we need? | How can technology help? | What safeguards are necessary? | Where must people remain responsible? | Where could I fit into this future?

WELCOME TO DRONE CAREER EXPLORER - WHERE TECHNOLOGY, CAREERS, AND REAL-WORLD PROBLEM SOLVING TAKE FLIGHT.

BEGIN HERE START HERE PROGRAM OVERVIEW RESOURCE MAP CHOOSE A GRADE BAND	FOR EDUCATORS & IMPLEMENTATION PARTNERS - Review the Grades 6-12 Program Overview to understand purpose, progression, and outcomes. - Use the Curriculum Resource Map to see how the video, guide, workbook, assessment, and implementation resources fit together. - Then enter the Middle School or High School course and use the resources in sequence.

FLEXIBLE IMPLEMENTATION OPTIONS

FULL PATHWAY Semester / Extended Sequence Teach the grade-band sequence from orientation through capstone and portfolio.	SELECTED MODULES Targeted Learning Use individual units for STEM, CTE, technology, career exploration, or interdisciplinary integration.	PILOT / WORKSHOP Short Implementation Use curated lessons, cases, and career challenges for a pilot, summer program, or enrichment experience.
---	---	---

NO-FLIGHT-READY | CAREER-CONNECTED | EVIDENCE-DRIVEN | RESPONSIBLE INNOVATION
